

▼ image to pencil sketch with python

importing libraries

```
import cv2
import matplotlib.pyplot as plt
from google.colab.patches import cv2_imshow
```

Reading the image

```
image = cv2.imread("images.jpg")
cv2_imshow(image)
```

✓ 0s completed at 2:09 PM

```
rbg = cv2.cvtColor(image, cv2.COLOR_BGR2RGB)  
cv2.imshow('rbg')
```

convert image RGB format to grayscale image

```
gray_scale = cv2.cvtColor(rbg, cv2.COLOR_BGR2GRAY)  
cv2.imshow('gray_scale')
```

Negative image

```
inverted_gray_scale = 255 - gray_scale  
cv2_imshow(inverted_gray_scale)
```

blurry image

```
blur_image = cv2.GaussianBlur(inverted_gray_scale,(25,25),0)  
cv2_imshow(blur_image)
```

inverted blurry image

```
inverted_blur = 255-blur_image  
cv2_imshow(inverted_blur)
```

pencil sketch

```
pencil_sketch = cv2.divide(gray_scale,inverted_blur, scale=255)  
cv2_imshow(pencil_sketch)
```
